Rarible case · 06.2021

2nd place and special prize

SKILLS

- Wide experience in **client-server** applications developing
- Working with **architectural patterns** (MVC, MVVM, MVP, VIPER, etc.)
- Cocoapods usage and experience writing **own pods**
- **Unit tests** writing
- Published **own applications**
- Have experience in implementing **in-app purchases**
- Extensive experience in interacting with various technology stacks, especially **Blockchain** (Solidity, WEB3 libs for Python and Node.js), as well as **WEB** (React, .NET), **GameDev** (Unity), **Desktop** (WPF, Java) and more

PET PROJECTS

Awesome avatar for Clubhouse: app to quickly create an avatar with a frame.

Includes a social program for branding community avatars

Features: **in app purchases, image processing**

Architectural pattern: **MVVM + Coordinator**

Cocoa pod «TagList» - This pod allows to add a list of highly customizable tags, setting common tags parameters, adding items with unique parameters

ATProjectGenerator - project generator I develop and use myself. Default project template contains **custom build phases** for user stories accounting and user stories modules **xcode templates**

GitManager - iOS Github client
Architectural pattern - **VIPER**

Taganrog Attractions Map - Map of attractions from Ministry of Culture database. Provide favorite lists, building routes, notifications when approaching a point
Integrations - **GoogleMaps SDK, Firebase, MapBox**
Architectural pattern - **VIPER**

COMMERCIAL DEVELOPMENT

SmartAirkey - service for managing smart locks. Allows you to control smart home devices via Bluetooth

Альбомика - service for printing photos from mobile devices
Architectural pattern - **VIPER**

Uapp - dating service for students (now in beta-test). The main feature of this service is an unusual design and custom layouts
Architectural pattern - **MVVM + Coordinator**

PhantomVPN - WireGuard iOS VPN client
Architectural pattern - **MVVM + Coordinator**

NCRAFTSMAN

I am the founder of a startup [NcraFTsman](#). My team and I are working on a full-cycle ecosystem for creating and promoting NFT collections. It includes mobile and web apps as well as tools for interacting with the audience through instant messengers. Below you can see the apps for the App Store, developed by me.

The **NaFTalene** App allows professional artists to create for free NFT from a portfolio and put it up for sale in one button.
Integrations - **Dribbble API**
Architectural pattern - **MVVM + Coordinator**
